

# Walkways and Access Platforms

**HERBERT**

**Multi-level Operation?**

**Difficult to reach areas?**

**We have the Solution**

Herbert catwalks in use at major potato processing plant

Herbert walkways providing safe access at various levels

Difficult to reach areas no longer a problem with Herbert's help

Herbert Engineering is able to provide a range of catwalks and walkways to provide safe access to all areas of your business / factory operation.

Better access means both easier and safer maintenance of your existing systems, resulting in greater efficiency and a reduction in costly repairs and downtime. By offering the choice of new or reconditioned walkways, Herbert can provide catwalks and walkways which are affordable and attainable to all businesses, regardless of size.

Herbert catwalks and walkways can be fitted over, through and around existing machinery and systems, providing a stable and secure access point for high and difficult to reach areas, instantly helping to improve health and safety issues.

Special kits are available offering sections and handrails for those areas impossible to reach by forklift.
