

Grading

Herbert is considered to be the market leader in grading technology, offering a flexible range of grading systems manufactured to the famous Herbert build quality.

Herbert's flagship products are the Contractor I and Contractor II mobile graders, both of which are available as 1800 and 2400 models and offer a choice between a fixed cleaning system and interchangeable cleaners, to suit your requirements.

HERBERT

GRADING

Contractor I
Cost effective grading with compact design principles
1800mm and 2400mm wide models

Star Cleaner
Produce cleaning system
Cleaner version of our contractor produce

HERBERT
GRADING

FEATURES

- 7 rows of 14 forged polypropylene star wheels
- 20mm square drive shafts
- Adjustable gap on first 3 rows of stars for heavy filling conditions
- Removable clod roller with scraper
- Easy vertical and horizontal adjustment of clod roller by simple lever mechanism
- Variable speed star drive
- Optional variable speed clod roller
- Heavy duty chain mechanism
- Standard gearbox with access ladder
- 900mm, 1200mm, 1800mm and 2400mm widths available

Mechanical Clod Separator
Removes clods from a mid size sample
This system is available in 711mm, 900mm and 1200mm widths

HERBERT
GRADING

FEATURES

- 95% efficient at removing clods from mids
- High roller spacing against manual selection
- Opportunity to split clean mids at harvest time
- High capacity separation with three row options

OPTIONAL ACCESSORY

- Roller arrangement with fixed steel drum
- Rolling stainless steel roller
- Adjustable chains for fine tuning
- Adjustable support framework
- Roller arrangement to increase delivery height of mids sample
- Integral conveyor for clods
- Manual separator table for 100% clod free sample

Grader Module
High capacity, accurate rotary screen sizing
Flexible clean grading in mobile configurations

HERBERT
GRADING

Herbert screen systems are robustly built to suit the demands of mobile operators. Modules can be integrated into mobile systems, which then, provide intake facilities on used as individual single grading units. The accuracy of rotary grading means this type of technology is very popular across a wide spectrum of sectors and product type.

Lift Roller Grader
Flexible grading system

HERBERT
GRADING

The Herbert lift roller grader offers flexible grading for operators from 50hp to 200hp for a range of produce. Stainless steel rollers convey produce through the machine removing the smallest first, then other sizes independently dropping through the rollers prior to the final drum. The flexible design allows it to take out up to 4 grades and delivers into conveyors for transport to the next process. The grader has variable speed drive for throughput adjustments with simple grade adjustments being made from the side via adjustable pins. The Herbert Lift Roller Grader provides an extensive grading size range between 20-50mm.
